Atlassian apps and use case library

As Atlassian Platinum Solution Partner, we have successfully completed many projects in many different business sectors and industries over the years. We are happy to share with you the use cases that are always requested regardless of any specific needs of our customers. You can view the respective add-ons for the use cases below.

**JIRA USE CASES**

Jira can meet the requirements for many use cases from simple task management to complex help desk solutions. We will help you discover exactly which tools you need for your situation.

**CONFLUENCE USE CASES**

Confluence is far more than simply a knowledge management tool. We'll help you find the right apps for the wide range of business processes and requirements in your company.
